EXPERIENCE

Division-M — ACR

Feb 2021

Try to solve the problems faced by students in my class. Help students to do contact with the faculty. Stand to do every work with CR

Division-M — Quiz Coordinator

May 2021

I have made two teams of interested students from my division. We create the questions and put it in google form and make the quiz. I started this to help the students who need push to study. Also, this activity is helpful for us as we are creating the questions for this, we do deep study. And successfully completed 5 quiz till yet. We take this quiz every Saturday.

EDUCATION

G.V.M School, Malkapur-10 class

I passed my 10 th class with 97 percent and came first in my taluka.

N.V.M College, Malkapur-12 class

I passed my 12 th class with 88 percent and came first from my college

VIT Pune-B. Tech-First Year

Artificial Intelligence and data science department

PROJECTS

Python-Assistant:

I worked on this python assistant project. It's basically a desktop assistant which will be helpful to open any application in our laptop. Only thing is that we have to provide the relative path according to our system.

Auto-Join:

I worked on this auto-join project which joins the meet automatically. It opens the web browser opens the google meet link then click on mic and camera button to make it off and also clicks the join button. All these things happen automatically we have to just run the program

Skills:

Essay writing.

Content Writer

Managing events

Working with group

Team spirit

Technical Skills:

HTML

CSS

LANGUAGES

C, C++, Python

Intern-Station:

This was the group project we made an app and a website. So, my role is to make the website. I have used HTML and CSS for frontend and have use very basic java script for the backend. Main motive of our project was to create the platform for freshers and startup companies to coordinate.

Hospital-Management:

It was a group project. This was a simulation type of project.

We did this on simio software. Our problem statement was to count the no of people entering into the ward with the help of simulation.

Air-Canvas:

- Working on an Air canvas projects which will track the hand position and able to write in air which will reflect on screen
